

Lumens PS752

Desktop Document Camera

Lumens[®]

Key Features

Excellent Image Quality

Sensor features low noise, high resolution, and vivid colour reproduction. Outputs and records smooth HD video, giving students and audiences a superb viewing experience. Enhanced with dual lamps and the backlit LED enables multiple uses with superb image quality.

USB Connectivity for Advanced Functionality

Link to a PC or Mac for access to advanced features. The camera and mic are compatible for video conferencing software as an ultra-flexible webcam. Also supports Ladibug Software with precise drawing, image & creative annotation tools.

Standalone Operation

Able to fold down for easy transport, and can be used standalone, with a PC. Simply plug in a wired or wireless mouse and enjoy being able to edit, annotate and adjust images directly. The auto tune button automatically adjusting the clarity, brightness, and colour.

Connectivity

The document camera features HDMI, VGA, and composite video outputs for easy connection to projectors and interactive touch panels. You can instantly switch between the HDMI/VGA outputs and the output of the document camera.

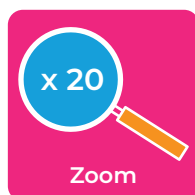

Storing and Display Video

PS752 records video with accompanying audio directly onto USB drives (upto 4TB), allowing you to store a very large number of files, without an PC or external storage.
