

IPEVO VZ-R Dual Mode Visualiser

Visualise the big picture, clearly.

IPEVO

IPEVO VZ-R introduces increased flexibility to the arsenal of educators, presenters and content creators. Featuring two connection options of HDMI and USB, you can either connect to a PC or directly into a projector, monitor or interactive touch screen.

Features

Straightforward and easily adaptable

The 8MP camera head can be flipped and rotated, so can double up as a webcam as needed, with the HDMI and USB connectivity allowing you to go straight to a screen or via a laptop.

Distance Learning/Remote Working

It's also fully compatible with video conferencing software, such as Zoom, Google Meet, Microsoft Teams and Skype via USB, which also allows you to utilise the free IPEVO visualiser software.

Convenient Built-in Features

Quick control buttons allow you to make adjustments directly without software, plus the LED light within the camera's head enables you to achieve high image clarity even in rooms without adequate lighting. A built-in microphone allows you to record lessons or attend video meetings with ease.
