

AVer F17+

Creativity and Versatility at your fingertips

AVerVision F17+ is a visualiser suitable for every classroom. Its 13-megapixel camera delivers 4K image quality, letting you easily present teaching material with its 23x zoom. Helping to inspire students' limitless creativity through hybrid interactive learning has never been easier than with the F17+.

Key Features

Beautiful Image Quality

The 13-megapixel camera combined with its 23x total zoom allows you to display your teaching material in a brilliant manner and lets students push their boundaries of imagination.

360-degree Flexible Arm

Bend and adjust the gooseneck however you want to always find the best viewing angle of people and teaching materials.

Ideal for Hybrid Learning

Ideal for hybrid classrooms. With a single button to snapshot and record, you can instantly make any teaching materials digital and interactive, as well as use the F17+ as an USB camera to start online teaching right away.

Enhanced Remote Teaching Software

One touch will connect your visualiser to your computer for easy content sharing while cloud sync support will offer automatic annotation, capture, and recording backup functions.

Image Streaming in 4K Quality

Present your teaching materials to the class with 4K resolution video quality via HDMI connectivity from your device to the display.
