

# Lumens DC136

## 4K Portable USB Document Camera

**Lumens**<sup>®</sup>

The Lumens<sup>®</sup> DC136 is a modern and easy-to-use USB document camera, featuring a 1/3" 13MP SONY image sensor and larger than the A3 shooting area, delivering vivid images, and extremely close-up views. The signature gooseneck design enables you to position the camera head in any direction or as webcam, empowering you to share and learn in person or in online classes.

## Key Features

### Excellent Image Quality

The 13-megapixel Sony sensor delivers bright images and vivid colours for professional-quality, supporting capture and live reproduction at resolutions up-to 4K. Delivering the finest detail and even fast action, DC136 is great for use in education and training.

### User friendly interface

Buttons on the base offer quick access control core functions. Auto-tune and focus buttons automatically optimise to produce sharp, colour balanced and bright images that look great on 4K monitors, projectors, and interactive touch screens.

### Audio and Video Recording

The built-in microphone can capture video with audio: to record motion, complete with on-screen annotation and voice-over making the device convenient for collaborative training and distance learning. Also compatible with online conferencing software.

### Imaging Flexibility

With a flexible, multi-angle, height adjustable gooseneck design, the DC136 is ideal close-up or wide-angle imaging. The lens can capture large documents and objects, in excess of A3 in size, giving the DC136 the versatility for use in any location for a wide range of applications.
